VISUAL POCKETS

Multi-use: Label your warehouse reliably with FATH's versatile Visual Pockets

FATH's Visual Pockets are part of the LEAN product family. Products which allow you to design your production and logistics processes to be more efficient and leaner.

Magnetic, reusable self-adhesive or attachable with accessories: Made of durable plastic with a reinforced header, the Visual

HIGHLIGHTS

- Magnetic, reusable self-adhesive or attachable with accessories
- Scanner readable
- A wide variety of colors and formats
- Numerous attachment options
- Durable with reinforced header pieces
- Conserving resources through multi-use

Pockets are available in the following versions: magnetic, reusable self-adhesive or attachable with accessories. Each version is available in four colors and three formats. You can use them to label all standard crates, boxes, and containers, whether they are made of plastic, metal, wood or glass. You can choose from numerous attachment accessories that are compatible with Euro boxes, plastic crates and trays, lattice boxes, SLCs, heavy load carriers, and many more.

The front of the Visual Pocket is made of a transparent film while the back is made of a colored plastic. Thanks to the nature of the transparent film, a scanner can easily read the inserted documentation without it needing to be removed.

Sustainable labeling: Through the multiple use of FATH Visual Pockets, you can save on purchasing costs and at the same time the use of resources and the amount of waste will be reduced. In this way, the requirements for high efficiency and greater sustainability in production and logistics can be harmonized. The clever product features of the FATH Visual Pockets improve work processes – and they bring more sustainability to the industrial environment.

UNIQUE WORLDWIDE: REUSABLE SELF-ADHESIVE VISUAL POCKETS

This is new: FATH's Visual Pockets are able to be reused again and again since the innovative adhesive retains its adhesion properties even after being detached. If a container needs to be re-labeled, the reusable self-adhesive FATH Visual Pocket can simply be removed. While conventional adhesives leave stubborn residues that need to be painstakingly removed, the new self-adhesive FATH products can be removed in one piece, easily and completely free of residue. Our adhesive remains adhered to the Visual Pocket and can be reattached elsewhere multiple times. This means that FATH's self-adhesive Visual Pockets are also suitable for temporary labeling. That is both lean and sustainable.

FATH

REUSABLE SELF-ADHESIVE VISUAL POCKETS

An adhesive strip is attached to the back of the reusable self-adhesive Visual Pocket. Remove the liner from the double-sided adhesive strip, press the Visual Pocket onto a suitable surface and you're done. This version of the Visual Pockets is especially suitable for wood, glass, plastic and precious metal containers. The Industrial Adhesive compensates for unevenness and offers a high degree of adhesion on many load-bearing surfaces immediately after attachment.

MAGNETIC VISUAL POCKETS

FATH's Magnetic Visual Pockets feature two welded-in neodymium magnets. They are suitable for attaching to all ferrous surfaces and are able to withstand strong vibrations thanks to strength of the neodymium magnets. Two individual magnets allow the Visual Pockets to be attached to round objects such as barrels and pumps. They can also remain firmly attached to metal wall paneling that is fluted or has a profiled surface.

ATTACHED VISUAL POCKETS

There are many accessories available to mount FATH's Attachable Visual Pockets. Brackets are attached through the punch holes in the Visual Pocket's reinforced header piece. The availability of different fastening options means Visual Pockets can be attached to almost any container – from SLCs and barrels through to drums and special load carriers.

FATH

VERSIONS

The Visual Pockets are are available in the following versions:

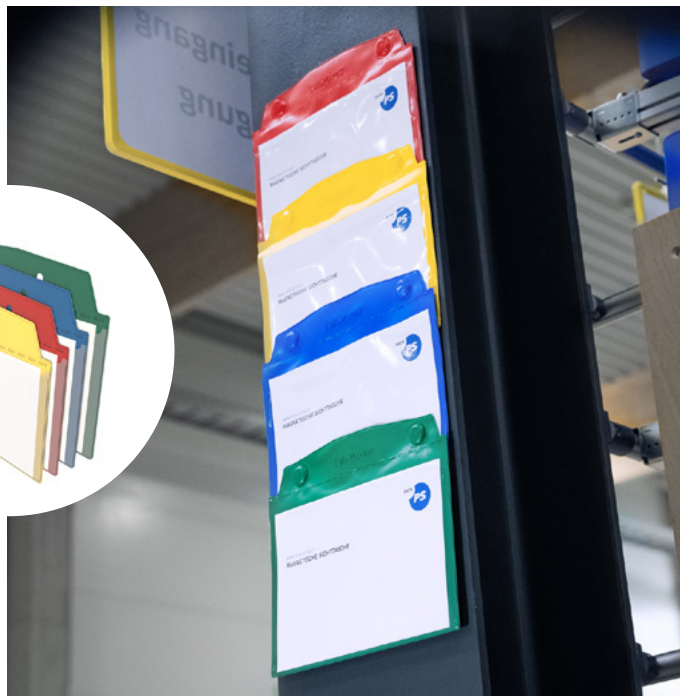
- Reusable Self-Adhesive
- Attachable with accessories
- Magnetic

Available in following Formats:

- DIN A5 landscape
- 1/3 DIN A4 portrait
- IN A4 portrait

Available in following colors:

① yellow
② red
③ blue
④ green

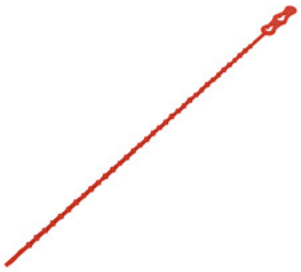


ACCESSORIES

U-loop steel clamp for Visual Pocket
For films, thinner cardboard packaging, and outer packaging

Plastic pin for Visual Pocket
For thicker cardboard packaging, foam, textiles, and plastic bags

Lattice Box Clip for Visual Pocket
For lattice boxes and steel cable for ceiling signage



Plastic Tie for Visual Pocket
For profiles, ducts, lattice boxes, and containers with handles

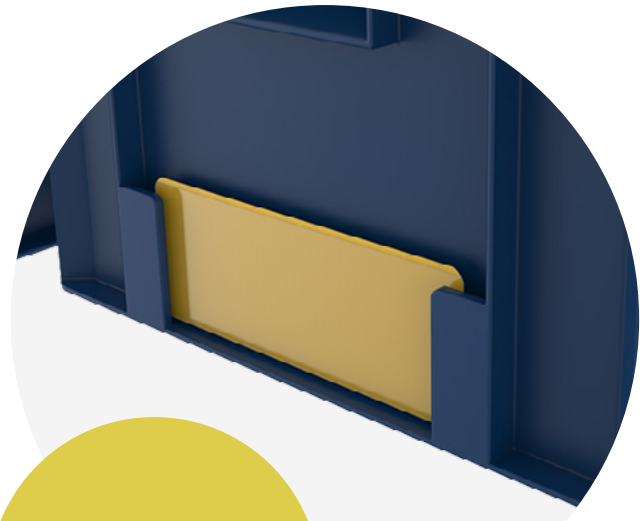
KANBAN LABEL HOLDERS AND ENVELOPES

Identify storage containers quickly and easily with FATH's KANBAN label holders and envelopes

The FATH KANBAN label holders are part of the PVC-free LEAN product family of FATH – products which allow you to design your production and logistics processes to be more efficient and leaner while helping to protect the environment at the same time. Instead of the problematic PVC material, plastics with extremely high strengths are used as well as a proportion of recycling material. LEAN products are UV-resistant, extremely durable and free from harmful substances.



REUSABLE, MULTI-USE

HIGHLIGHTS

- Self-adhesive
- Magnetic
- For hanging over
- KANBAN clip document holder with extremely strong clamping ability
- KANBAN label holder as per VDA standard
- Scanner readable

With the many variants of the FATH KANBAN sleeves and label holders, the Kanban concept can be easily implemented on the shop floor and in intralogistics. The labelling clearly structures the tasks and processes, the pull principle is realised and waste is avoided. The products help to increase productivity and are suitable for both series production and batch-size-oriented workshop production.

MAGNETIC, SELF-ADHESIVE OR FOR HANGING OVER

Made of transparent, hard-wearing plastic, FATH's KANBAN label holders are available in magnetic, self-adhesive and hang-over versions, all of which are available in different formats. This allows you to label almost any load carrier, container or lattice box with little effort.

The transparent plastic allows scanners to read the inserted documents without difficulty.

FATH'S KANBAN LABEL HOLDERS
versions and attachment options

FATH

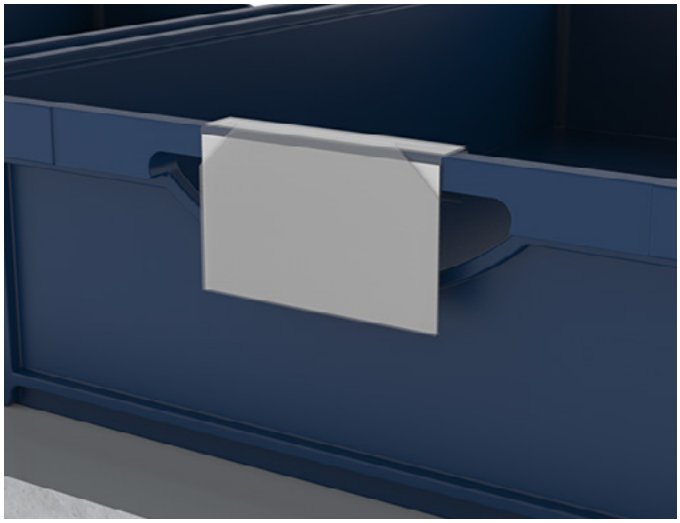
LARGE LABEL HOLDERS –
SELF-ADHESIVE OR MAGNETIC

The self-adhesive KANBAN label holders are easily affixed to load carriers and remain attached to the object. They are suitable for labeling containers such as Euro boxes and SLCs. Documents can be replaced at any time as required – they can be inserted and removed in an instant thanks to the front foil's slanted edge. The self-adhesive KANBAN label holders are unique due to their reusability and offer flexibility never seen before. The adhesive adheres to glass, plastics, metal and all smooth surfaces.

TIPP
With stable magnetic stripes attached to the back the magnetic version is suitable for metal containers and many other ferrous surfaces.

KANBAN LABEL HOLDERS –
FOR HANGING OVER

Overhanging KANBAN label holders are fabricated in a single piece and are simply placed on the container edge. They can be removed again at any time. Due to its standardized dimensions, this version offers an excellent clamping ability and the containers remain stackable without any limitations. It offers a practical solution for labeling Euro boxes, plastic crates, etc. which need to be cleaned frequently, for example.



SMALL KANBAN LABEL HOLDERS –
SELF-ADHESIVE WITH CLIP FUNCTION AND VERY STRONG CLAMPING ABILITY

The practical KANBAN clip document holders need to be affixed just once and are suitable for all containers with a non-laminating surface as well as for pallet feet. Insert documents such as material cards or item information cards into the label holders and you instantly have a clear identification of the materials. The KANBAN Clip document holder can be affixed to the inside of the container when necessary in the case of grab containers and semi-open front storage containers. Since re-labeling can be completed in seconds, KANBAN clip document holders are the perfect solution for frequent document changes.

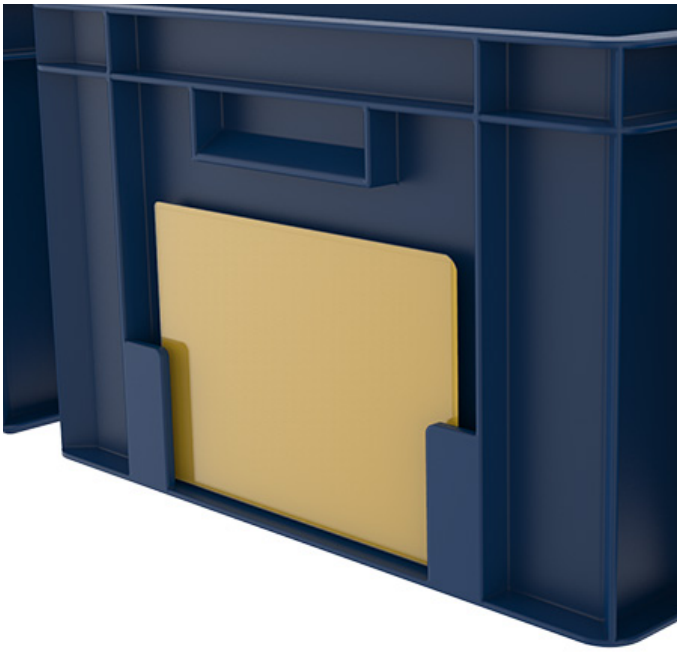
TIPP
Thanks to its particularly strong clamping ability, this document holder is also excellent for thick Kanban cards.

FATH

KANBAN ENVELOPES AS PER VDA STANDARD – OPEN AT THE TOP OR SIDE

FATH's KANBAN envelopes are extremely easy to use – simply insert or remove document in an instant. They comply with VDA standard 4902 and can be instantly inserted into the pre-assembled bracket on containers, such as SLCs. Ideally suited for production time cycles.

Documents or cardboard inserts are protected against dirt and moisture in the FATH's KANBAN envelope version with an opening at the side. Documents remain legible even in production environments containing humid or oily air where processes such as turning, milling, grinding, or drilling take place.



VERSIONS

The FATH KANBAN sleeves are available in the following sizes:

- 200 x 67 mm
- 200 x 85 mm
- 200 x 135 mm

and in each case in the following variant:

- open at the top
- open at the side

The FATH KANBAN covers are available in the following colors:

① transparent
② yellow
③ red
④ blue
⑤ green
⑥ grey
⑦ black
⑧ white

SIDE OPEN KANBAN ENVELOPE 200 X 135 - 7.9" X 5.3"

MODEL	Side open
DESCRIPTION	Strong and durable envelope for inserting in SLC boxes (small load carrier), Euro containers, Kanban boards etc.; Protects Kanban cards from dirt and abrasion; Tear-resistant and stretchable transparent foil with restoring capacity, scanner-compatible
MATERIAL	Plastic PVC
COLOR	Transparent, yellow, red, blue, green, gray, black, white
PACK QUANTITY	50 pieces

FATH

SHELF LABELINGS

Lean and sustainable: Label shelves accurately with the reusable FATH Shelf Labelings

FATH Shelf Labelings can be reused in the self-adhesive version. If the shelves need to be relabeled, the labeling can easily be removed. While conventional adhesives leave stubborn residues that have to be tediously removed, the new self-adhesive products from FATH can be removed in one piece and completely residue-free. The adhesive sticks to the shelf labeling and can be immediately reattached elsewhere multiple times.

PVC-FREE & REUSABLE

HIGHLIGHTS

- Self-adhesive versions can be reused many times thanks to an innovative adhesive
- Easily reposition magnetic versions
- PVC-free material
- Many different formats and colors
- With and without color index
- Scannable

The shelf label holders are available as reusable (multi-use) self-adhesive or magnetic, either with or without color index and in numerous formats for labeling all standard rack cross beams. Inserted documents are held securely on all types of shelf racks, can be read by a scanner and are easy to change.

FATH Shelf Label Holders are part of the PVC-free LEAN product range for visualization – products with which you can make your production and logistics processes more efficient and leaner and at the same time contribute to greater sustainability. Extremely high-strength plastics are used along with recycled material instead of problematic PVC. The LEAN products are UV-resistant, extremely durable and free from harmful substances.

UNIQUE WORLDWIDE: REUSABLE (MULTI-USE) SELF-ADHESIVE SHELF LABELINGS

This is new: The FATH self-adhesive shelf labelings are reusable again and again, as the innovative adhesive retains its adhesive ability after being removed without leaving any residue behind. The special adhesive smooths unevenness and offers excellent instant adhesion on almost all load-bearing substrates. Simply peel off the backing of the double-sided adhesive tape, press on and it's done!

THIS IS LEAN AND SUSTAINABLE

Quick, flexible labeling saves work time. Multiple use also saves resources and reduces the amount of waste.

FATH

ONE OF A KIND: SELF-ADHESIVE SHELF LABELINGS FOR MULTIPLE USE

Something new: The self-adhesive FATH Shelf Labelings can be reused multiple times, since the innovative adhesive retains its adhesive function after being removed and leaves no residue. The special adhesive smooths out unevenness and offers excellent instant adhesion on almost all load-bearing surfaces. Simply peel off the backing of the double-sided adhesive tape, press on and you're done!

MAGNETIC: INSERT SHELF LABELINGS IN ONE STEP

The magnetic design of FATH Shelf Label Envelopes and Label Holders provide a strong grip on all ferrous surfaces. Once attached, the shelf labeling will remain in place, even withstanding strong vibrations, for example when storing goods with the forklift truck. If relabeling is required, the magnetic shelf labeling is simply removed and repositioned with one movement. The magnet is firmly bonded to the holder and guarantees stability and durability.

OPTIONAL: CARDBOARD INSERTS FOR LABEL PRINTING

Placement of shelf labeling could not be easier with FATH: Sheets of cardboard in DIN A4 format are available for all sizes – with microperforation in every label size. The sheets are suitable for any standard printer. Fill in templates, separate and insert labels, attach shelf labels – and your shelves are labeled accurately.

VERSIONS

The shelf label holders are available in the following versions:

- Reusable (multi-use) Self-adhesive
- Magnetic

Dimensions of the shelf label holders:

- 5 height dimensions between 20 and 67 mm
- 3 width dimensions between 75 and 150 mm
- additional 67 x 200 mm

Colors of the shelf label holders:

① yellow
② red
③ blue
④ green
⑤ black
⑥ white

SIDE OPEN MAGNETIC LABEL ENVELOPE 60 - 2.4"

MODEL	Magnetic
DESCRIPTION	To hold labels; For magnetic mounting on metallic surfaces, e.g. shelves; Side open only for special protection against wet and dust, tear-resistant and stretchable transparent foil with restoring capacity, scanner-compatible
MATERIAL	Label envelope: Plastic, PVC Magnetic strip
COLOR	Yellow, red, blue, green, white
PACK QUANTITY	50 pieces

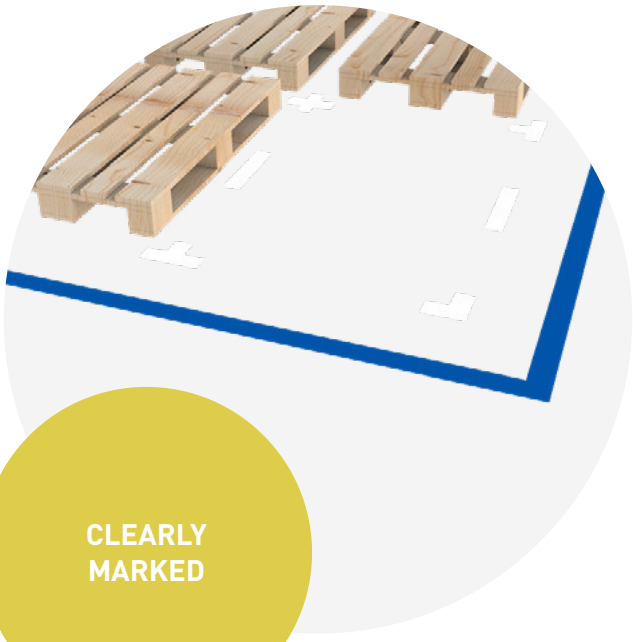
FATH

FLOOR MARKING TAPES

FATH Floor Marking Tapes for quick and durable marking

With FATH self-adhesive Floor Marking Tapes, you can mark surfaces easily and safely. One of the most important functions of floor marking is separating vehicle routes and walkways. Clearly marked walkways ensure that employees and visitors stay safe if industrial trucks or forklifts are moving around the production area or warehouse.



CLEARLY MARKED

HIGHLIGHTS

- Outstanding adhesive strength
- Forklift-resistant
- Suitable for almost all industrial floors
- Removable without leaving residue
- Very dimensionally stable: adhesion without prior marking
- Available in all relevant colors
- Available in different stress classes

You will comply with the obligation to visually separate vehicle routes from walkways with FATH Floor Marking Tapes. ASR A1.3 specifies that vehicle route boundaries should be delimited by marking strips at least 5 cm wide. Stair steps can also be clearly marked with adhesive tape in signal colors to minimize the risk of falling.

FLOOR MARKING TAPES: FORKLIFT-RESISTANT AND INSTANTLY AFFIXED

The dimensionally stable FATH Floor Marking Tapes can be cut to fit your needs and affixed to industrial floors without prior marking. Vehicles can drive over them immediately, and they are easy to clean. They are suitable for almost all industrial floors and surfaces such as stone, concrete or metal. Unlike paint or lacquer markings, there are no long drying times and no unpleasant odors. Thanks to the durable plastic surface suitable for industrial use, the floor marking tapes withstand heavy use by forklift trucks.

FOR SPECIAL REQUIREMENTS:

The Floor Marking Tapes EXTRA Strong are dimensionally stable, even when moving pallets and lattice boxes or maneuvering forklifts.

FATH

HIGHLY DURABLE MULTI-COLORED FLOOR MARKING TAPES

Thanks to a new printing concept, the multi-colored FATH Floor Marking Tapes are extremely durable. The color print is applied on the inside and is covered by a transparent film. This means that the print image is fully enclosed between the film and the adhesive and is thus permanently protected against wear and scratches, even after long use and heavy stress on the surface.

COLOR CODING SYSTEM FOR SAFE VISUALIZATION

FATH Floor Marking Tapes are available in rolls in widths of 50, 75 and 100 mm and in all important marking colors – in single color and two-color versions. This enables companies to set up a secure color coding system for walkways, separate areas, storing spaces, parking spaces and entire areas in production plants and warehouses. When used correctly, the selected colors provide a largely intuitive recognition of the marked areas.

VERSIONS

The self-adhesive FATH Floor Marking Tapes are available as rolls in the following versions:

Roll:

- Length: 50 m
- Width: 50 mm/75 mm/100 mm

Roll EXTRA Strong:

- Length: 25 m
- Width: 50 mm

Colors

① yellow
② orange
③ red
④ light blue
⑤ blue
⑥ green
⑦ white
⑧ black
⑨ red/white
⑩ black/yellow
⑪ white/blue

Colors EXTRA Strong:

① yellow
③ red
⑤ blue
⑥ green
⑦ white

The FATH floor marking tapes are also available in the width 50 mm as temporary tape TESA® 60760. Here the length is 33 m on a roll.

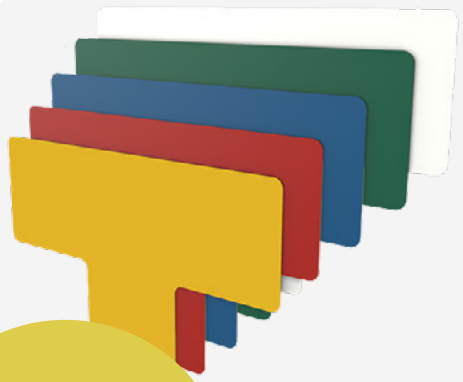
FATH

FLOOR MARKING SHAPES AND FLOOR WINDOWS

Flexible and lean: Mark surfaces with self-adhesive FATH Floor Marking Shapes and Floor Windows

With the self-adhesive, dimensionally stable FATH Floor Marking Shapes and Floor Windows, you can implement visualizations immediately. They are simply stuck on at the desired location, are immediately available for foot or vehicle traffic and are easy to clean. They are suitable for almost all industrial floors and surfaces such as stone, concrete or metal.



VARIETY OF SHAPES AND MATERIALS

HIGHLIGHTS

- High adhesion and forklift-resistant
- Suitable for virtually all industrial floors
- Pre-punched shapes in L/T/I/ foot shape
- Windows in different DIN formats
- Scannable
- Very dimensionally stable: adhesion without prior marking
- Available in several colors
- Available in different stress classes

Unlike paint or lacquer markings, there are no long drying times and no unpleasant odors. Thanks to the durable plastic surface suitable for industrial use, the floor shapes can withstand heavy stress from forklift trucks. Ideal for designating pallet storing positions.

For extreme loads, for example when moving pallets and lattice boxes or maneuvering forklifts, Floor Marking Shapes EXTRA Strong are also available.

FATH FLOOR MARKING SHAPES: NOW ALSO IN EXTRA STRONG

For heavy-duty use, there are the Floor Marking Shapes as EXTRA Strong versions. They are dimensionally stable even when moving pallets and lattice boxes or maneuvering forklifts.

The Floor Marking Shapes EXTRA Strong are additionally available in a rounded version

FATH

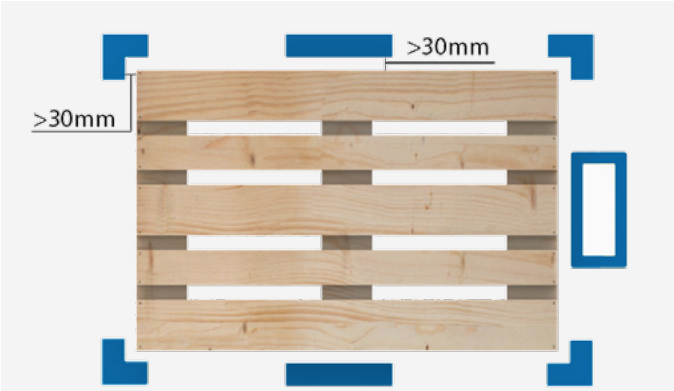
WHAT'S SPECIAL ABOUT FATH FLOOR WINDOWS

The print for the colored frame is applied on the inside. This allows the signal color to be fully enclosed and thus provides permanent protection against wear and scratches. The color also remains visible after prolonged use – even heavy use in areas driven over cannot harm the floor windows.

Documents in various sizes up to DIN A4 are inserted behind the transparent plastic window and can be scanned through the viewing window. The 40 mm frame width ensures immediate recognition, even from a distance. The document assures you that the material is available in the right position.

DESIGNING INDIVIDUAL SIGNS WITH FATH FLOOR WINDOWS

FATH Floor Windows are also ideal for designing individual signs or warning notices based on your needs. Simply place the printed documents with the required information behind the viewing window and stick on the bottom window.



TIP
When the floor marking shapes are affixed with a spacing of approx. 30 millimeters to the provisioning areas, they are well protected against wear and tear.

VERSIONS

The self-adhesive Floor Marking Shapes and Floor Windows are available in the following versions:

FATH FLOOR MARKING SHAPES

Formats:

- T shape*
- L shape*
- I shape*
- Foot shape

* also available in EXTRA Strong

FATH

FLOOR SIGNS

Safe and lean: Easily highlight danger zones with self-adhesive FATH Floor Signs

With FATH Floor Signs, you can comply right away with the applicable regulations for the marking of hazardous zones. The floor signs can be walked on and driven on immediately after gluing.

INCREASE SAFETY

HIGHLIGHTS

- Pictograms as per ASR standards
- Outstanding adhesive strength
- Forklift-resistant and extremely durable
- Suitable for virtually all industrial floors
- Adhesive applied over the entire rear side
- Non-slip thanks to the textured surface
- All common prohibition, mandatory, warning and information signs
- Strong signaling effect

The pictograms on the FATH Floor Signs are designed in compliance with ASR standards. The floor signs are 450 millimeters in size and ensure that the icons can be seen from a distance – when viewed from a forklift, for example. This means that they comply with the German Technical Workplace Regulations (ASR) and meet the requirements specified in the German Workplaces Ordinance (ArbStättV), which serve to ensure safety and health protection for employees.

FATH'S FLOOR SIGNS: SELF-ADHESIVE AND FORKLIFT-RESILIENT

The self-adhesive, dimensionally stable FATH Floor Signs are easily affixed to the floor, can be driven over immediately and are easy to clean. They are suitable for virtually all industrial floors and surfaces. Unlike paint or lacquer markings, there are no long drying times and no unpleasant odors. Thanks to the adhesive applied across their entire back surface, these floor signs even permanently adhere to problematic surfaces.

ANOTHER ADVANTAGE:

FATH Floor Signs have a textured non-slip surface.

NEW PRINTING METHOD PROTECTS AGAINST SCRATCHES

FATH

WHAT MAKES FATH FLOOR SIGNS SPECIAL

The pictogram's color print is applied to the inside instead of on the outer surface and is then covered with a transparent protective film. This means that the image is fully enclosed between the film and the adhesive. It is permanently protected against wear and scratches, even after long use and heavy stress on the surface. The durable plastic surface is suitable for industrial use and can withstand heavy loads, such as forklifts driving over it.

VERSIONS

All common signs in the following categories are available:

- Prohibition signs
- Mandatory signs
- Warning and information signs

FATH FLOOR WINDOWS FOR CUSTOMIZED WARNING SIGNS

If you want to attach specific information or warnings on the floor, FATH Floor Windows are the ideal solution. You can use them to design your own customized warning signs that fit your needs. Simply place the printed sheets behind the transparent, scanner-compatible viewing window and affix the floor window. Different DIN formats and colors are available.

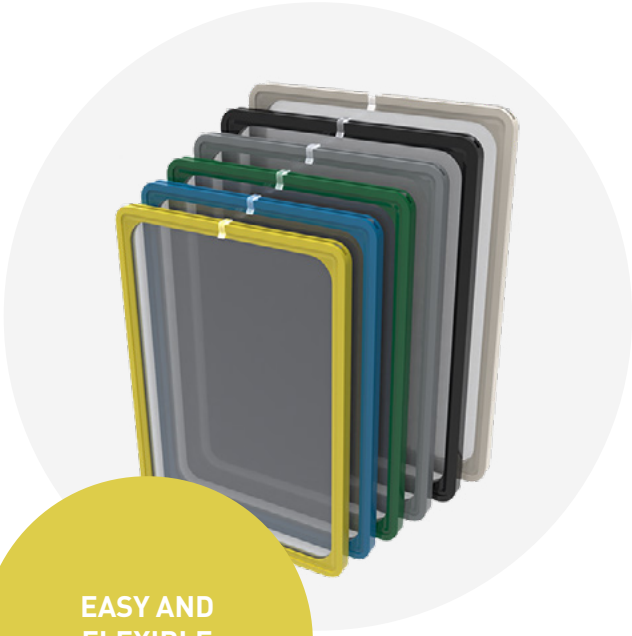
FATH

SIGN FRAMES

Mark industrial areas quickly and clearly

With the FATH message frames, all areas in production, warehouse, and logistics can be marked easily and expediently. Due to the double-sided usability, different information can also be provided on each side.



EASY AND FLEXIBLE MOUNTING

HIGHLIGHTS

- For A3, A4 and A5 printouts
- Both sides can be used – portrait and landscape
- Wide range of mounting options
- Easy to attach without tools
- PVC-free product

You can print your information documents on a standard printer and immediately insert them behind the A3 / A4 format film - no cutting or alignment is necessary. Since the film is closed on one side, the printout can be securely positioned with a single hand movement and cannot slip. The film completely encloses the printout, so that the paper is well protected.

The border of the message frame is narrow – the entire information area of the A3 / A4 printout is visible. The flexible transparent film makes handling particularly efficient. At the same time, the frame offers the necessary rigidity to give the signage a high level of dimensional stability and to keep the paper completely legible. The different frame colors allow you to implement the signage according to your individual color standard.

VISUAL MANAGEMENT MADE EASY

The versatile attachment options make the FATH placard holder a multifunctional visualization tool. Different clips are available for quick mounting. Simply clip onto the frame and hang, stick, pin or magnetically attach the signage to the shelf crossbar - with the right accessories, your signage will be affixed to almost any supporting structure and in any environment in seconds. To change the format, simply reposition the clip. The locking clip included in the set secures the film and the print against slipping, whatever the orientation.

FATH

ACCESSORIES

FATH message frames can be used for almost any application thanks to the extensive range of signage accessories. Hanging the frame above areas, machines or bays is the simplest way to achieve visualization. The use of a knotted chain and plastic hooks allows for flexible labeling at any height. The message frame can be attached directly to machines or shelves using magnetic holders. Whether portrait or landscape format, FATH accessories can be attached in both orientations. The different frame colors allow assignment to your existing color coding system.

Closing Clip
For closing message frames, prevents transparent foil from falling out
Teile-Nummer 02042CC

Hanging Hook
For fast and easy hanging of message frames; Easy swap of message frames due to open hooks
Teile-Nummer 02042HH

Swivel Loop
For fast and easy hanging of message frames; Secure hanging due to closed loop, 360° rotatable
Teile-Nummer 02042SE

S-hook
For fast and easy hanging of message frames
Teile-Nummer 02042SH

Tube Clamp
For durable mounting of message frames; Easy to attach to tubes and tubular frame profiles with Ø 28 mm -30 mm outer diameter
Teile-Nummer 02042PC

Swivel Magnet Holder
For hanging message frames; Fast and easy mounting with integrated magnet, 360° rotatable
Teile-Nummer 02042MH

Aluminum Tube (Set)
To hang up message frames with pipe clamps, several message frames can be attached next to another; Helpful visualization even in greater hights
Teile-Nummer 02042AT

Knotted Chain
For durable and easy hanging of message frames; Easy shortening of the chain
Teile-Nummer 02042KC

Ceiling Magnet with Hook
For hanging message frames; Fast and easy mounting with integrated magnet
Teile-Nummer 02042CM

FATH

STABLE AND HIGH-QUALITY VARIANT:
FATH SIGN HOLDER WITH ALUMINUM BODY

FATH sign holders with a solid aluminum body are the ideal solution. They can be mounted on all profile-based fixtures in a few simple steps - independent of the system and in all dimensions: from above, from below, and from the side. If necessary, eyebolts can also be used to suspend the sign holders from the ceiling. This means that they can also be used in warehouses and logistics.
The aluminum base body gives the FATH sign holder sufficient weight and rigidity to remain stable and virtually free of movement in the desired position. The PVC-free, oil-resistant plastic surface is easy to wipe clean and withstands rigorous use. These outstanding product features ensure clear labeling on the shop floor under almost any condition.
This variant is also designed to allow quick change of signage at any time and to hold your printouts securely in the sign holder - without slipping or overhanging. Two cover caps for closing the sides are included.
FATH sign holders can be reused and remounted as often as necessary - a sustainable LEAN product.

+

EVEN MORE FLEXIBLE WITH FATH FRICTION JOINTS

Highly flexible alignment of FATH sign holders is achieved through the use of FATH friction joints. This means that the sign holders can be turned and tilted exactly as the work process requires – without tools and with a single hand movement. Friction causes the sign holder to be held firmly in the desired position. This application is also ideal for signaling.

FATH

INSERTING SYSTEMS

Efficiently structure production processes and the flow of goods and information with FATH Inserting Systems

ATH Inserting Systems for document sizes DIN A4, DIN A5 and 1/3 DIN A4 are a simple tool for implementing the Kanban principle in line with lean production. This creates an efficient organizational structure that ensures oversight in daily production operations. The inserting system boxes ensure a seamless process in the provision of information and materials. The desired sequence for order processing can be controlled by using the inserted cards.

EFFICIENT GOODS AND INFORMATION FLOW

HIGHLIGHTS

- Inserting boxes for sizes DIN A4, DIN A5 and 1/3 DIN A4
- Wall mounting, e.g., for Kanban boards
- Break-proof wall file pocket for single use, e.g., as a mailbox
- Simple and clear provision of information throughout the entire shopfloor

Single compartment, Kanban box or Kanban board: In day-today operations, the inserting system boxes provide quick access to the relevant information and allow processes to be put in the right order.

Practical wall mounting for clear structure and quick oversight: Sturdy metal wall brackets for screwing onto profiles, walls or machines are available as accessories for all FATH inserting system boxes. This means you can implement your individual inserting system and quickly and easily adapt it to changing requirements at any time.

INSERTING SYSTEM BOXES FOR WALLS AND KANBAN BOARDS

Boxes for A4 documents hold construction drawings, shipping documents, etc. If the A4 documents are folded, A5 inserting system boxes can be used and the space requirement will be significantly smaller. When placed one below the other, the individual inserting system boxes create a column that can be used as a Kanban board.

The boxes show which activity is to be processed next or what should be produced in the next step. A system as simple as it is efficient.

INDIVIDUAL INSERTING SYSTEM

Fast & easy

FATH

KANBAN BOARD:
FATH INSERTING SYSTEM FOR KANBAN CARDS

The 1/3 DIN A4 boxes are specially designed for Kanban cards in accordance with the VDA standard. When the material is used up, the Kanban card is removed from the Kanban container and inserted into the corresponding box on the Kanban board. This signals the need for replenishment and the production can be continued without lead times being affected. That's lean!

VERSIONS

FATH Inserting Systems are available in the following versions:

Systems / document size Inserting system boxes for column formation:

- DIN A4 portrait
- DIN A5 landscape
- 1/3 DIN A4 portrait / VDA standard

with additional viewing windows in:

- 1/3 DIN A4 landscape, small & portrait, large
- DIN A4 landscape, small & portrait, large
- DIN A5 landscape, small & portrait, large

ACCESSORIES

FATH inserting systems can be adapted even better to your needs with the following accessories:

- Kanban wall holder
- Magnets (set)

PRACTICAL & STABLE

WALL FILE POCKET:
COMPREHENSIVE INFORMATION UNDER CONTROLS

FATH screw-on Wall File Pockets made of break-proof plastic can serve as a single compartment for a stack of documents or for files of all kinds, such as orders with multi-page drawings and test reports, or as a collection box for Kanban cards. There is also room in the holders for thicker document stacks and process folders. In the logistics and production process, they provide a quick overview and full transparency in another respect:

FATH Wall File Pockets are themselves transparent. FATH Wall File Pockets have two parts. The solid plastic mounting plate is screwed to the wall, the machine or the profile. The transparent front part can easily be snapped into place on this sturdy bracket. The front of the inserting system box is cut out for quick access to smaller documents. The Wall File Pockets are made of extremely shatterproof special plastic and can be used in any production environment.

VERSIONS

Wall File Pockets as single compartment

- DIN A4 portrait & landscape
- DIN A5 portrait & landscape

FATH

VISUAL BOARD

Key figures clearly and flexibly: All important information at a glance with FATH Visual Board

The surfaces of the FATH Visual Board are made of enamel – top of the line! A glasslike mixture is applied to the metal surface at temperatures of around 1000 degrees Celsius and then hardened. The result is a surface with special properties.

ENAMELED SURFACE & RESIDUE-FREE CLEANING

HIGHLIGHTS

- Scratch-resistant enamel surface
- Permanent protection against marker residue
- Magnetic over the entire surface
- Wide range of accessories
- Space-saving and practical designs

The whiteboard surface is extremely easy to clean by simply wiping it dry. While conventional whiteboards with lacquered surfaces still leave residues from writing after wiping them down, the FATH Visual Board can be cleaned without leaving any residue.

The enameled surfaces are scratch-resistant, extremely resilient and retain their smooth feel over the long term. They remain undamaged even after daily use and repeated writing and wiping. In addition to writing, the entire metal surface can be used with magnets, thus turning the whiteboard into a magnetic board.

SPACE-SAVING MIRACLE ON ROLLERS

Thanks to its four enameled sides, the cube-shaped FATH Visual Board provides an incredible amount of space on a small footprint. About one square meter of floor space is required to provide as much information as on a whiteboard almost three meters wide. Since the mobile enamel cube fits through any standard door, it can be placed in any space, from meeting rooms to production and warehouse areas. The space-saving, square design is especially suitable for transportable provision of detailed information and production notices. The metallic surfaces on the mobile enamel cube are also framed in 40x40 aluminum profiles. The visible sides of the profile are enclosed to protect against contamination and deposits.

Industrial rollers with brakes are optionally available in an ESD version.

+

SMART ACCESSORIES

The FATH UTENSILO is the perfect addition to your FATH Visual Board. Board markers, cleaning agent and board erasers are neatly stored and are always handy where you need them. A marker is easily removed by twisting, while the cap remains in the UTENSILO and cannot get lost. Thanks to the magnets attached on the back, the UTENSILO sits securely on any magnetically adhesive, smooth surface. Left-handed users can adjust it to their needs by turning it 180°.

FATH

ORGANIZER UTENSILO

Order and ergonomics: the FATH UTENSILO keeps markers, caps and erasers neatly tucked away and within easy reach

The FATH UTENSILO is the clever storage solution for all the tools you need to work effectively on a whiteboard. Board markers, caps, cleaning agent and erasers are neatly stored and are always handy where you need them. The rear-mounted magnets make it easy to attach the UTENSILO to any magnetic whiteboard. This practical aid will also sit securely on machines or other magnetic surfaces.

FOR LEFT- AND RIGHT-HANDED USERS

HIGHLIGHTS

- For all magnetic whiteboards
- Fixed slots for four markers
- Marker caps stowed tightly
- For right-handed and lefthanded users
- Dry erasing with highly absorbent erasing felt
- Self-adhesive erasing felts for quick and easy replacement

Both right-handed and left-handed users can intuitively manage the UTENSILO. Simply turn the top part 180°, reposition the holder for the pump bottle – and you're ready with the version that is optimally adapted to the needs of left-handed users. The FATH UTENSILO comes with four board markers (in black, blue, red and green), an erasing felt and a pump bottle with cleaning liquid. As needed, erasing felts can be reordered in a package of 20.

You can equip the board markers with felt if you wish. This makes it easy to make small quick corrections effortlessly while writing by turning the marker over.

The FATH UTENSILO comes in neutral gray, similar to RAL 7042.

CLEVER HOLDER: MARKERS REMAIN HANDY – CAPS SAFELY STOWED AWAY

The UTENSILO has four marker slots. What's so special: The holders are designed so that a marker can be removed with one hand by a slight twisting movement. The rotation locks the cap in the holder and keeps it safely in place. You hold only the marker and close it again after use by simply inserting and turning it in the UTENSILO. No searching for the cap, no drying out of the marker, no accidental insertion! To remove the marker completely, simply turn it a little further and pull out the marker including the cap.

FATH

SOPHISTICATED BOARD ERASER FOR DRY AND WET CLEANING

The flat, ergonomically shaped board eraser fits comfortably in your hand. To clean the whiteboard, a self-adhesive felt pad with a high absorption capacity is simply pressed onto the eraser. Thanks to the adhesive layer on the back, it adheres without slipping and can be removed without residues after use. The fibers of the wafer-thin felts absorb the marker color with a light wiping. For heavy or stubborn soiling, the UTENSILO also has a cleaning fluid without propellant in a pump bottle. As the cleaning fluid dries quickly, it does not run down the board.

The board eraser fits seamlessly on the upper part of the UTENSILO, but also sticks separately exactly where it is needed.

ACCESSORIES – LEAN AND SUSTAINABLE

With these accessories, you can restock the FATH UTENSILO over and over again:

- Whiteboard markers, set of 4, black
- Whiteboard marker, set of 4, colored (blue, red, yellow, green)
- Cleaning felts
- Cleaning agent

THE PERFECT PAIR: FATH UTENSILO AND FATH VISUAL BOARD WITH ENAMELED SURFACE

Thanks to its closed surface, the enameled FATH Visual Board is extremely resilient and particularly easy to clean – simply by dry wiping, without any residue. In combination with the FATH UTENSILO, you have available a durable, practical and easy to manage visualization solution.

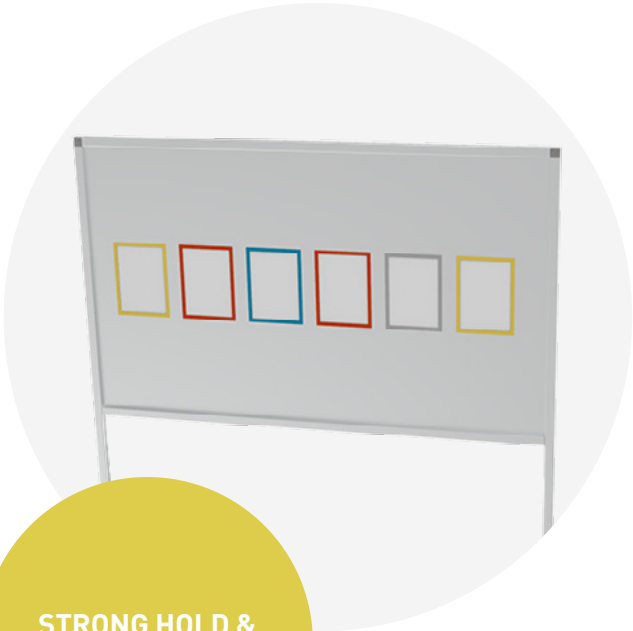
FATH

FATH MAGNETIC DOCUMENT WINDOWS

Provide information in a clearly arranged, secured format with magnetic FATH's document windows

What makes magnetic document windows so special: The frame color is printed on the inside. This procedure completely encloses the ink between the film and the magnetic strip, thus permanently protecting the print on both sides from wear and scratching. Color intensity is maintained even with prolonged use. The different frame colors allow you to create a color index for specific products or



STRONG HOLD & HIGHLY VISIBLE

HIGHLIGHTS

- Special printing concept
- Long-lasting frame color
- For document sizes A3 (11.7" x 16.5") and A4 (8.3" x 11.7")
- Can be used in landscape and portrait formats
- Available in many colors
- Clear structure

define a color chart for topic blocks. For example, the 4mm wide color frame makes it possible to clearly identify and selectively communicate target achievements, quality, order backlogs, personnel deployment matrix, personnel qualification matrix, and general employee and company information. The color coding enables all employees to see relevant notices intuitively at a glance. Visual boards and other metal information surfaces can be laid out in a neatly structured manner.

Through the magnetic attachment, there are numerous application possibilities: On the shop floor visual boards to hold information on shift handovers or quality meetings. On enclosures and machine protection fencing to identify machines or on electrical control cabinets to advise circuit diagrams and safety instructions.

QUICK AND FLEXIBLE INFORMATION PROVISION

You can use these magnetic document windows to attach required information and data to any metal board or surface using their simple, variable, clearly arranged format. The magnetic strips with extra strong adhesion on the back of the document window are designed to be used in either portrait or landscape format. The magnetic document windows are available for document sizes A3 (11.7" x 16.5") and A4 (8.3" x 11.7"). Receipts and documents can be changed instantly, provide a secure hold, and are protected from dirt by the transparent window. The transparent window is scanner readable and easy to clean.

FATH

VERSIONS

The magnetic document windows are available in DIN A4 (8.3" x 11.7") and DIN A3 (11.7" x 16.5")

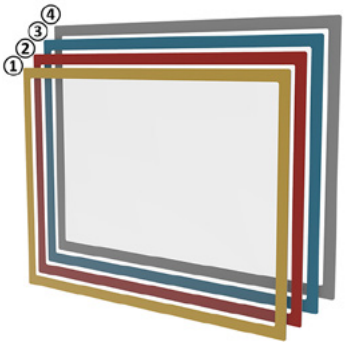
The following colors can be ordered:

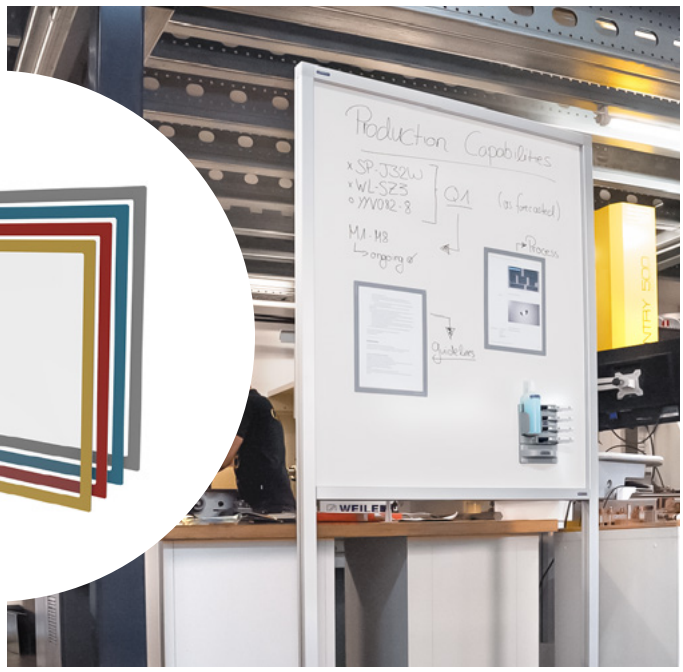
① yellow

② red

③ blue

④ grey





VISUAL BOARDS: EVERYTHING AT A GLANCE

The FATH document windows can be used on the FATH Visual Boards, for example. Due to their magnetic effect, the document windows adhere very well to the enameled surface. This combination is simple, variable and clear. This is how lean works!

FATH

ETRIKE PLATFORM SCOOTER

Efficient transportation of people and materials in plant logistics and production

With the eTRIKE Platform Scooter, you can effortlessly cover long distances indoors and outdoors. Thanks to its sturdy base, the electric transport and company scooter offers an approved total weight of up to 350 kg. This corresponds to a payload of approx. 255 kg for the PLS 135 model and approx. 220 kg for the PLS 175.

EFFICIENT TRANSPORTATION

HIGHLIGHTS

- Range approx. 40 km, programmable Vmax from 8 to 15 km/h
- Flexible use thanks to configurable transport surface
- Particularly maneuverable and compact: Fits through any door with a width of 800 mm
- No driving license requirement
- Available with road approval for Germany
- Own coloring possible
- Production in Germany
- Maintenance-free lead gel battery with extremely long service life

Thanks to its slim design, it slips smoothly through doors or narrow aisles and can even travel in passenger elevators. Transport processes in industrial environments can be significantly accelerated with the practical 3-wheel scooter - while at the same time optimizing the deployment of personnel.

With the eTRIKE you can reach four times the walking speed and saving around 75% of the time. This enormous time saving not only enables faster order processing, but also impressive added value. From a distance of just 5 km per week, the investment in the eTRIKE pays for itself - a smart move for your company.

More details and eTRIKE in action

etrike-scooter.com

GOOD COMPANION:
Flexible, helpful, sociable – and also economical

FATH

ROAD APPROVAL FOR EVEN MORE FLEXIBILITY

The combination of compactness and road approval enables a new type of electric mobility for efficient everyday work. Are your business premises separated by public roads? This is no obstacle with the optional road approval. Approved with a small insurance license plate, your employees can ride on roads, footpaths, cycle paths and pedestrian zones. This simplifies the networking of decentralized storage and operating sites.

SIMPLE OPERATION – AND COMPLETELY SAFE

No driving license is required for operation, only a minimum age of 15 years. We recommend categorizing the vehicle internally as an industrial truck. This makes the eTRIKE Platform Scooter a vehicle for almost everyone in the company. Thanks to its low center of gravity, it offers a high level of stability. With simple accessories such as an anti-slip mat, mirror or LED rotating beacon, you can ensure even greater safety. Whether the compact PLS 135 or the larger PLS 175 model, they can be used in cellars and elevators, as there is no risk of fire from the lead gel battery. And to make things even easier for you, we can carry out maintenance on the eTRIKE for you on request.

CLIMATE-FRIENDLY E-MOBILITY AND ENERGY RECOVERY

The eTRIKE Platform Scooter manages the balancing act between efficiency and sustainability. With its 1000 watt wheel hub motor, it covers long distances on the store floor and the entire company premises quickly and whisper-quietly - exhaust-free and without harmful emissions. Good for the ecological footprint and employee health. Thanks to energy recovery during braking, the eTRIKE consumes particularly little power and can cover a distance of over 40 kilometers.

TWO MODELS – CONFIGURATION AS REQUIRED

The eTRIKE Platform Scooter is available in the compact PLS 135 version and as the PLS 175 model with a larger loading area, which offers sufficient space for cardboard boxes, Euroboxes, tools or goods. We have a range of practical accessories for customizing your scooter: tablet holder, rotating beacon, special attachments and much more. Trim your scooter precisely for your use.

The range of accessories depends on the model (with and without road licence).

ACCESSORIES:

Demand-orientated equipment – countless application possibilities

OPTIONALLY WITH INDIVIDUAL COLORING

As standard, the eTRIKE Platform Scooter cruises through the halls in the color combination black and silver. For users with high demands on the company's corporate design, we offer a different color selection on request.

ASSEMBLY ON REQUEST

Whether in maintenance, intralogistics or facility management - there are no limits to the applications. We customize the design and build the eTRIKE Platform Scooter according to your needs. The development expertise is bundled at the headquarters in Spalt and production takes place in Germany, which enables rapid implementation.

FATH

EXTRUSION PROFILE PLATE I8

FATH Extrusion Profile Plate I8: Innovative base for highly efficient work

A new product from the FATH LAB – unique on the market in all its dimensions. The FATH Extrusion Profile Plate I8 is a solution that can greatly simplify work processes in the industrial work environment. Made from lightweight, resilient aluminum profiles, it offers

WIDTH UP TO 5 METERS

HIGHLIGHTS

- Slot plate size up to 5000 mm wide and 3340 mm long
- Can be used as a platform, pallet and large-format clamping plate
- Very durable, distortion-free and dimensionally stable
- Aluminum natural or anodized
- Sturdy aluminum cover caps available as accessories

continuous slots on the top, bottom and sides and thereby opens up countless practical application possibilities for production & assembly, warehousing & logistics and the LEAN environment.

Individual constructions: The many slots on the entire surface of the FATH Extrusion Profile Plate I8 result in highly flexible screw-on options. The complete system module for slot I8 is compatible, so you can easily build your construction based on the extrusion profile plate. Whether as a clamping surface, for transport, as a storage option for special products, as a basis for a protective housing or as a slot wall – there are virtually no limits on ways to use it. Such flexibility is unattainable with wooden or plastic pallets.

Also thanks to the accessories, countless applications of the Extrusion Profile Plate I8 can be realized - from matching pallet feet to high-quality casters in a wide variety of designs for easy and safe movement, even with heavy loads.

UNIQUE SIZE: EXTRUSION PROFILE PLATE UP TO 5 METERS WIDE

An outstanding feature: Thanks to a special manufacturing process, the FATH Extrusion slot pallet I8 can attain a width of 5000 mm!

You can select any width you require in a grid of 200 mm. The standard extrusion profile plate measures 1200 mm x 800 mm with a height of 80 mm. The maximum constructible length is 3340 mm. A strong base: FATH Extrusion Profile Plate I8 in EU pallet size can bear a weight of up to two tons. It is thus in no way inferior to a wooden Europlate, but offers many additional advantages that make the work processes surrounding the material flow significantly more efficient.

RESISTANT AND UNIVERSALLY APPLICABLE

FATH

USE AS A SLOT PALLET, SLOT PLATFORM OR LARGE-FORMAT SLOT CLAMPING PLATE

The following examples show only a fraction of the possibilities – let yourself be inspired.

AS A PALLET FOR WAREHOUSE & LOGISTICS

Choose the size of the FATH Extrusion Profile Plate I8 exactly according to your requirements, and it can become your customized pallet. With a lifting roller or swivel caster, you can turn it into a mobile platform for intralogistics. Made in standard Euro pallet size, the lightweight pallet easily fits into the pallet rack.

The aluminum construction leaves no chips and is suitable for clean rooms. Even pre-produced core components for large machines can be stored cleanly and safely during the construction phase.

FOR TRANSPORT

In mechanical engineering, the FATH Extrusion Frofile Plate I8 can bring significantly more efficiency to the manufacturing process. Large workpieces can remain on the extrusion profile plate and be transported in the assembly hall for further processing steps. So you can implement uninterrupted flow production.

Even heavy work machines can be easily moved to where they are needed – securely clamped using the slots on the extrusion profile plate. A wide variety of rollers are available for use as transport trolleys.

AS AN INTEGRATIVE BASE PLATE FOR MACHINES

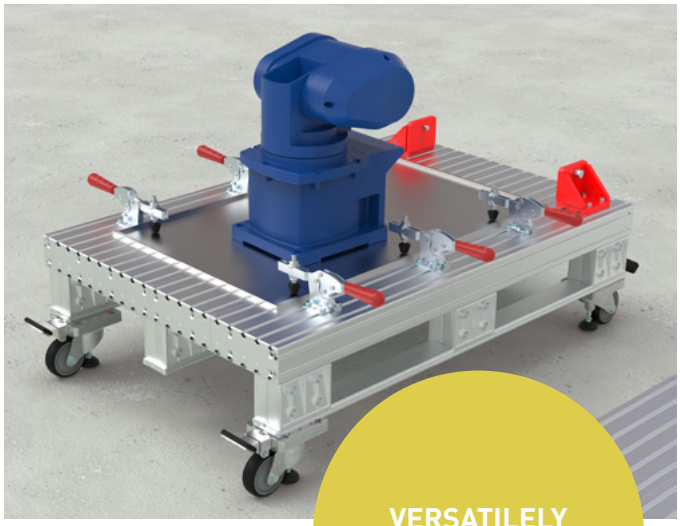
The FATH Extrusion Profile Plate I8 can be used as an assembly platform in mechanical engineering and as the base element for the machine. The machine can be easily and stably fixed to the many T-slots so that the extrusion profile plate becomes an integral part of the final product.

AS WORKPIECE CARRIER OR WORK TABLE

As a mounting platform or clamping plate for the secure mounting of workpieces, tools, machines or robot arms on the many slots, the RESISTANT AND UNIVERSALLY APPLICABLE FATH Extrusion Profile Plate I8 can be transformed into a customized work and assembly table.

The working height can be individually selected – for greater productivity while at the same time facilitating hand movements. This is also an advantage in terms of ergonomics!

By screwing on rollers underneath the platform, you can easily make this workstation mobile. This means that the device can also support the production of very large products, as large components can be easily moved into the correct position and processed further with less effort.



VERSATILELY APPLICABLE

NATURAL OR ANODIZED ALUMINUM

In the standard version, the FATH Extrusion Profile Plate I8 is left untreated. This ensures a high level of surface robustness even in harsh environments and offers an excellent price-performance ratio.

The extrusion profile plate is also available anodized on request. In this version, a width of up to 1200 mm with a length of 3340 mm is possible. Another benefit: Unlike conventional wooden pallets, the FATH Extrusion Profile Plate I8 is also suitable for sensitive areas and clean rooms.

RESISTANT AND UNIVERSALLY APPLICABLE

FATH

ACCESSORIES: COVER CAP AND PALLET BASE

Special cover caps were developed for the FATH Extrusion Profile Plate I8 in the FATH LAB. They are screwed on at the side and securely close off the outer edges. The cover caps are made of aluminum for high durability and maximum stability. Thanks to the recesses, the slot ends remain free and T-slot nuts and other components can be easily inserted on the front sides.

Special pallet feet, matching skid profiles and cover caps are available for use as a slot pallet.

FATH COMPONENTS FOR UNLIMITED MOBILITY

Swivel and fixed casters, electric and hydraulic lift casters and lifting foot: FATH offers a full range of components with which you can move virtually any structure based on the FATH Extrusion Profile Plate I8. Choose the right caster for your application. The FATH Lift Caster is suitable for a smaller load. The new FATH Fixed Caster with a 200 mm diameter makes even heavy loads mobile.

FATH

ADAPTER PALLET FOR DOLLIES

Smart logistics: The FATH Adapter Pallet enables the transportation of dollies with automated guided vehicle systems.

With the FATH Adapter Pallet, dollies can be transported and stored particularly efficiently. The dollies can remain on the adapter pallet throughout the entire process chain. External transport by truck is possible without problems, as the dollies are locked automatically and fully loaded adapter pallets can be stacked on top of each other.

ROLLING LOGISTICS 4.0

HIGHLIGHTS

- Automatic locking during lifting with fork arms
- Safety device: Unlocking by pressing the foot pedal
- Seamless cross-plant transport via truck and track
- Brand independent: Can be used with all 400 x 600 mm dollies
- Roller track capable
- High-bay racking dollies can be stored on any level

This enables seamless transport across the entire internal and external logistics chain - without repacking or restacking the SLC within the individual production steps. This allows material staging and logistical processes to be optimized and costs to be reduced.

If raw products or semi-finished products are delivered on adapter pallets, restacking at goods receipt is no longer necessary. The logistics chain for external finishing processes is significantly improving through the use of adapter pallets since the material doesn't need to be repacked for inter-plant transport.

The FATH Adapter Pallet can be used with almost all standard dollies. In the 600 x 400 mm dimension, four fit on one pallet, two, in the 1200 x 800 mm dimension, one in the 800 x 600 mm dimension. The dollies can be loaded or stacked with other dollies as empties – this ensures highly efficient space utilization in logistics.

UNIQUE: AGV CAPABLE THANKS TO AUTOMATIC LOCKING

The FATH Adapter Pallet is the first pallet that can be transported with an AGV (driverless transport system). It has a sophisticated and very robust locking mechanism. A spring automatically closes the locking flap when the adapter pallet is lifted one centimeter by a forklift, a pallet truck or AGV. This also makes it possible to position rolling goods on inclined loading ramps or uneven production surfaces. Special attention was paid to occupational safety. To prevent the lock from being opened accidentally, it is unlocked by deliberately releasing the lock manually with the distinctive red foot switch.

ANOTHER ADVANTAGE:

The FATH Adapter Pallet is roller track compatible. It is recognized as a pallet by all common transport systems.

INTER-PLANT TRANSPORT
WITHOUT REPACKING

FATH

STORAGE ON SMALLEST AREA

FATH Adapter Pallets are designed so that they can be easily stacked on top of each other when empty. In production and logistics, a small area of 1200 x 800 mm is already sufficient to store several adapter pallets and make them available for immediate use. Even adapter pallets that are fully loaded can be stacked without any problems. This means that a lot of material can be stored without having to restrict the production area on the shop floor.

You can also optimize the use of space in the warehouse. Since dollies are automatically locked in place on the FATH adapter pallet by a sophisticated locking mechanism, loaded adapter pallets can be stored safely in the high rack (the FATH pallet lid, for example, is ideal for securing the transported goods). Material flow and material supply can thus be organized efficiently and in a space-saving manner, even in the case of storage.

IDEAL ADDITION: FATH DOLLIES AND FATH ADAPTER PALLET

You can use the FATH Adapter Pallet immediately with your existing dollies. If you don't already have your own dollies, FATH Dollies are the ideal complement. The dollies are designed for all SLC/Euro 600 x 400 mm containers and offer maximum flexibility for small and medium lot sizes. As empties, they can be safely stacked and stored in a minimal amount space. The zinc plated steel frame can support up to 250 kg.

The casters of the FATH Dollies are equipped with high-quality and extremely durable wheels from the manufacturer Blickle Germany. Wheel types for all application areas and usage scenarios are available, for example, particularly quiet-running, extremely non-slip, non-marking or ESD wheels.

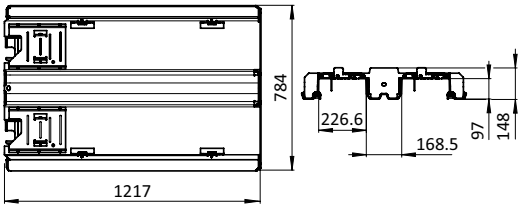
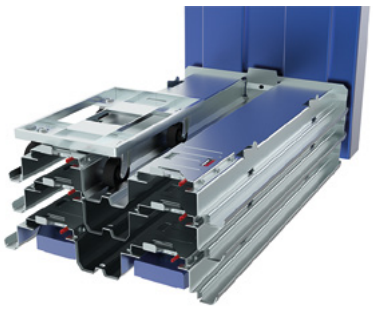
ADAPTER PALLET FOR DOLLIES

MODEL	AGV compatible
DESCRIPTION	For efficient transport of dollies 600 x 400 (4 pieces on one level), 800 x 600 (2 pieces on one level), or 1200 x 800 (1 piece on one level); Dollies can be loaded or stacked with other dollies as empties; The adapter pallet is roller conveyor, forklift and AGV compatible (AGV = automated guided vehicles) and locks the dollies automatically by lifting them from the forklift or AGV
MATERIAL	Steel
SURFACE	Zinc plated / plain
PACK QUANTITY	1 piece



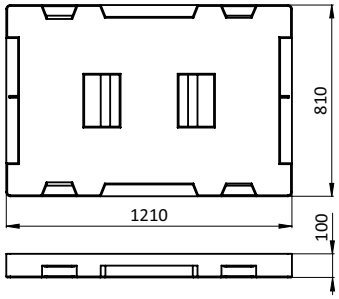


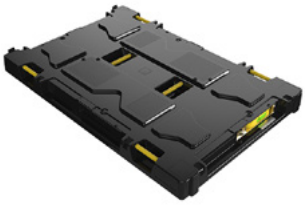
Version	Weight [kg]	Part #
For Dollies without lateral guide	45.0	0207APS12X8S05
For Dollies with lateral guide	45.0	0207APS12X8S04

©2025 | fath24.com

PALLET LID EURO 1200 X 800 WITH RATCHET STRAP MECHANISM AND HOOKS

MODEL	For adapter pallet
DESCRIPTION	To quickly secure dollies on adapter pallets; Environmentally friendly and cost-saving as there is no need to wrap them in stretch film; Durable and lightweight construction with replaceable strap cassettes
MATERIAL	Plastic PP
COLOR	Black ≈ RAL 9004
PACK QUANTITY	1 piece





Version	Weight [kg]	Part #
for Dollies and Adapter Pallets	9.0	0211EP8X12

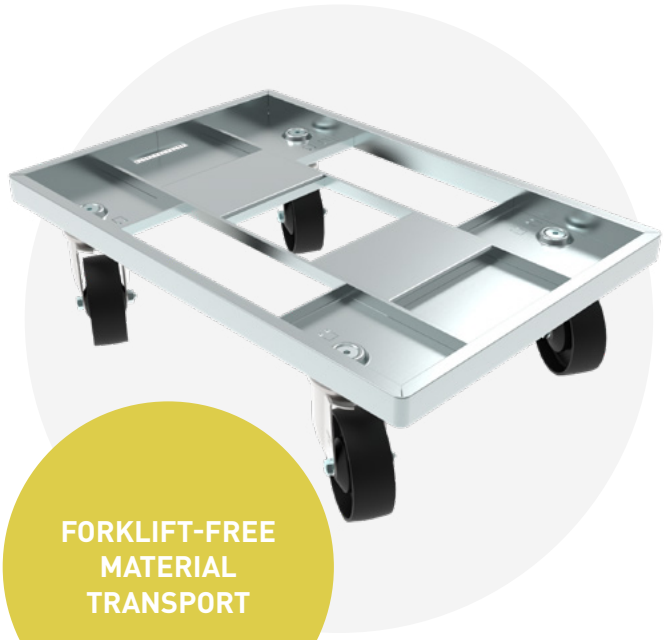
FATH

DOLLIES

Optimized material transport: Reduce space requirements thanks to the ability to target provisions exactly where needed with FATH Dollies

Organize material flow efficiently and save space - without using forklifts: The dollies are designed for all SLC/Euro 400 x 600 mm containers and provide maximum flexibility in intralogistics for small and medium-sized batch sizes. In addition, there is a version available for the Euro pallet dimension 800 x 1200 mm. Empty, the dollies are stackable and can be stored ian the smallest of spaces. Even when loaded, they only require a small area.



FORKLIFT-FREE MATERIAL TRANSPORT

HIGHLIGHTS

- Empty dollies can be stacked to save space
- High load carrying capacity up to 1000 kg
- Versions with and without lateral guide
- Towing bar systems suitable for tugger trains
- Blickle brand wheels for all applications
- Suitable for adapter pallets
- Compatible and stackable with existing dollies

The dollies are also suitable for safe transport on adapter pallets. This allows storage on a rack and external transport by truck and rail.

Our 600 x 400 Dollies have a load capacity of 250 kg while the pallet-sized version can carry up to 1,000 kg The Euro pallet version can also become a working surface without a forklift. The optional stacking frame raises the level of the stacked pallet to work level.

A suitable push bar is available for SLC-sized Dollies. As an option, the Euro pallet dolly can be equipped with detection pads for automated guided vehicles (AGVs). This means that the system can also be used automatically.

BLICKLE GERMANY BRAND QUALITY WHEELS

All FATH rollers for dollies are equipped with high-quality wheels manufactured by Blickle Germany. The branded wheels manufactured in Germany are well-engineered and proven products and are very durable. Various versions of wheel types are available for all applications and application scenarios. Depending on your requirements, you can, for example, choose particularly quiet running, extremely anti-skid, non-marking or ESD wheels for your dollies. Almost any requirement for dollies in manufacturing, warehousing and logistics can be met - This saves time and makes workflows more efficient.

ANOTHER ADVANTAGE:

FATH Rollers on SLC-sized Dollies are securely and stably mounted on the Dollies with a single centering screw. This saves time and makes workflows more efficient.

A FOCUS ON ERGONOMICS

FATH

VERSIONS FOR EVERY MATERIAL HANDLING REQUIREMENT

FATH Dollies are available for a wide range of applications. With 4 swivel casters for rolling in any direction, or for track-following with 2 swivel casters and 2 fixed casters.

Elevated structures for ergonomic removal: No more bending down when removing or filling goods. The side plates are welded to the long sides of the Dollies; they arrest the containers securely and ensure a firm hold without any slipping or tipping, even when rolling over uneven ground.

Available sizes:

Standard sizes:

- 400 x 600 mm
- 800 x 600 mm

Customized solution:*

- 1.200 x 800 mm

LOOKS GOOD: FATH DOLLIES AND FATH ADAPTER PALLET

In combination with the FATH Adapter Pallet, your FATH Dollies become high-bay capable. Since the dollies are securely locked on the adapter pallet by a sophisticated locking mechanism, the loaded adapter pallet can be stowed in the high rack. FATH Adapter Pallets also enable cross-plant transport of dollies by truck and rail without repacking or restacking. When reloading from one means of transport to another, the dollies simply remain on the adapter pallet. Fully loaded adapter pallets can be stacked on top of each other. This improves logistical processes and reduces costs. You thereby achieve a quantum leap in efficiency and flexibility in internal and external logistics.

PRECISE PROVISION

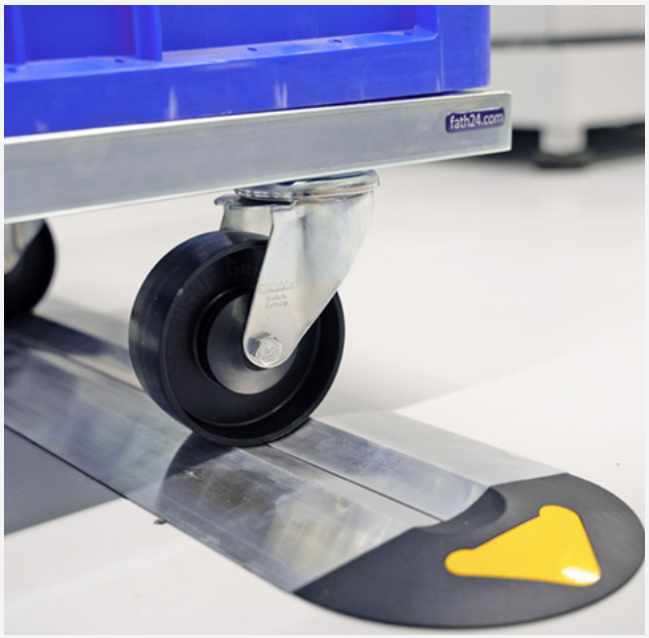
FATH accessories for parking Dollies

FATH

STRONG PARTNERS: FATH DOLLIES AND FATH PARKING RAILS

With FATH Parking Rails, the FATH Dolly becomes a lean solution that provides significantly more structure and efficiency to material provision. FATH Parking Rails are simply glued on, , the industrial high-performance glue guarantees extremely high adhesion. Bright yellow triangles in the end caps signal the exact position, and parking and unparking is easy and smooth. By driving onto the rails, the dollies are parked with pinpoint accuracy and are protected against unintentional rolling away, even on uneven floors - without brakes on the rollers. The material is available in the movement and gripping area of the assembly worker. This allows you to achieve a clear-cut order in the material feed and minimize space requirements.

More about the FATH Parking Rails:
parking-rail.fath24.com



PERFECT INTERACTION: FATH GUIDING RAILS FIFO AND FATH DOLLIES

FATH Guiding Rails FIFO, in combination with FATH Dollies, ensure efficient and space-saving material staging, as well as an optimized internal flow of goods. With the guiding rails, you can set up a FIFO station exactly according to your individual requirements. The FIFO station can be expanded quickly and easily at any time because of its floating, screwless design. One guiding rail per track is sufficient for the safe placement of the dollies. The side on which the dolly is guided can be freely selected. For example, for three tracks, only three guiding rails are required. The extra wide infeed caps allow the dollies to be threaded in effortlessly.

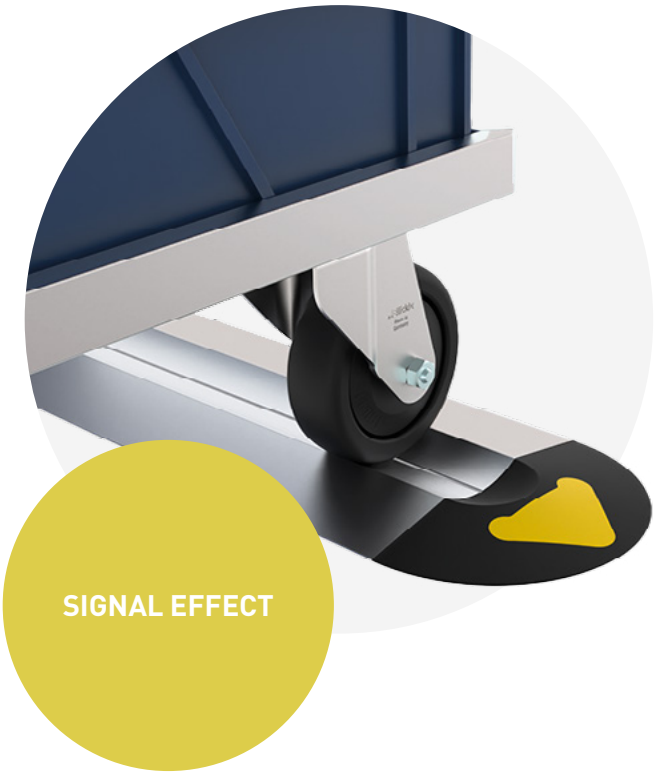
FATH

PARKING RAILS

Precise, space-saving and safe positioning of Dollies

Lean your production processes in a simple way with the FATH parking rails. The parking rails mark the exact parking positions for dollies or in-house trolleys. By driving onto the rails, each employee automatically parks the wagons always accurately at the right position.



SIGNAL EFFECT

HIGHLIGHTS

- Precise positioning of dollies and wagons
- Clear order in material management
- Efficient use of space
- More safety in the shopfloor area
- Easy installation: place, glue down, ready to use
- One-piece signal end caps are separately available

The required material is thus immediately available in the movement and gripping space of the assembly worker - targeted, structured and always in the right quantity. Even when robots are used, the parking rails ensure precise material supply. A waste of space is avoided by the orderly use of the floor and adjoining processes are not disturbed due to the low construction height of 6 to 10 millimetres - if no drollies are parked, the space can be freely used. High loads, such as driving over with industrial trucks, are no problem for the robust aluminum rails.

The aluminum parking rails from FATH are underside coated with a high-performance industrial glue that guarantees extremely high adhesion. Remove the protective film, lay on the parking rails, stick the rails onto the floor over their entire surface - that's it! Small uneven areas in the floor and expansion gaps are compensated by the adhesive. The different height versions of the parking rails are designed for the different loads of the dollies. This ensures easy maneuvering into and out of parking spaces, as well as providing a firm restraint for lighter and heavier dollies. Low resistance when positioning dollies ensures smooth workflows that are gentle on the back.

GREATER SAFETY: DEFINED PARKING POSITION AND SIGNAL EFFECT FOR MORE SAFETY

The parking rails secure the floor dollies against unintentional movement. When filling or removing material, the carts are reliably held in position - even on uneven floors, without locking devices on the rollers. Driveways and walkways remain clear and production areas remain easily accessible.

Groundbreaking: Bright yellow triangles in the end caps signal the exact position of the parking rails. This is a detail that facilitates efficient material feeding and provides additional safety. The low tapered end caps also minimize the danger of tripping.

FATH

FATH PARKING RAILS ARE AVAILABLE IN 3 VERSIONS

Modular lengths of 400, 800, 1200 and 2400 mm

High: For light to medium weights
The double-sided 10 mm high version is particularly suitable for light and medium weights. Dollies can be moved in and out of the parking rail from both sides and are securely held in place.

Flat – High: For medium to heavy weights
The flat – version with 6 mm / 10 mm height, ensures a clearly perceptible starting resistance and thus simplifies the positioning of the dolly on the parking rail. Pushing the dolly out over the flat side is particularly easy on the back, even with heavy weights, as only a small amount of force is required.

Flat: For heavy weights
The flat design with a height of 6 mm on both sides allows heavy loads or loads that are difficult to maneuver, such as rollable garbage containers, to be parked and unparked effortlessly in both directions.

ACCESSORIES

Unique on the market: One-piece end caps
The self-adhesive end caps consist of a single piece – simply attach the end caps and press them onto the floor. Locking lugs ensure immediate correct positioning immediately. The undersides are coated with industrial-grade adhesive. The bonding prevents the ingress of impurities – and your hall floor is not damaged by drill holes.

The one-piece end caps are available in five complete sets for each parking rail version:

- End Cap (Set) High
- End Cap (Set) High,
  with parking rail distancing for large wheel diameters
- End Cap (Set) Flat – High
- End Cap (Set) Flat – High,
  with parking rail distancing for large wheel diameters
- End Cap (Set) Flat

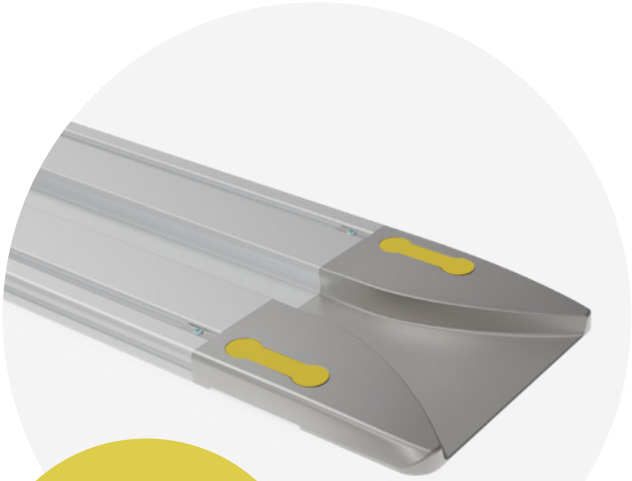
FATH

GUIDING RAILS FIFO

Build a FIFO Station based on need while saving space with FATH Guiding Rails FIFO

Due to the modularity, the FIFO station can be flexibly adapted in length and width. - you can set it up exactly according to individual requirements and expand it at any time. The Guiding Rails FIFO are bolted together with connecting plates directly at the infeed caps. This connecting element ensures stability and specifies the track width. The number of tracks can be selected as required.



EFFICIENT MATERIAL SUPPLY

HIGHLIGHTS

- Modular system – scalable at any time
- Extra wide, break-proof insertion caps
- Upward-facing profile slots for cost-effective enclosure
- Floating installation without screwed joints
- Space-saving thanks to onesided rail guide
- Easy and fast threading of dollies

For the desired track length, the individual Guiding Rails FIFO are joined together with a longitudinal connector. Available are the standard lengths 1200, 1800 and 2400 mm and on request in the length you require.

The FATH Guiding Rails FIFO are laid in a floating manner. The FIFO track does not have to be screwed to the floor to rest securely, which protects the hall floor. The rails are held by the dead weight of the dollies. For special requirements, bolting to the floor is optionally possible, the holes are integrated in the insertion caps.

One guide rail per track is sufficient for the safe placement of the dollies. The side on which the Dolly is guided can be freely selected. For three tracks, for example, only three Guiding Rails are required. This reduces costs, saves space and offers additional flexibility.

INNOVATIVE: EXTRA WIDE INSERTION CAPS FOR EASY THREADING OF DOLLIES

FATH has redesigned the infeed caps for even more efficiency in handling the Dollies. The extra wide designed opening acts like a funnel and makes loading the FIFO station much easier. Even if the rollers are not visible at all under the boxes, they can be threaded effortlessly into the rail. Employees can perform this step intuitively – the workflows are fluid and easy on the back.

The insertion caps are mounted at the front and rear end of each track. This allows the FIFO principle (First-In-First-Out) to be implemented perfectly - for an optimized internal flow of goods.

ANOTHER STRONG PLUS:

The FATH infeed caps for the FIFO station are manufactured using the aluminum die-casting process and, unlike conventional plastic caps, are break-resistant.

WORK MORE EFFICIENTLY IN PRODUCTION
EASY THREADING

FATH

THE FATH GUIDING RAILS FIFO:

The design is unique on the market: rectangular joints allow a cost-effective enclosure, for example for marking tracks. Due to the 8 profile slot incorporated in the Guiding Rails FIFO, superstructures with all common 40 x 40mm profiles can be easily mounted. A post for the signage is simply placed from above at a 90° angle and securely anchored in the slot. Integration on protective enclosures is also possible without complications.

PERFECT INTERACTION:
FATH GUIDING RAILS FIFO AND FATH DOLLIES

In combination with the FATH Dollies, material supply becomes even more efficient. The Dollies are designed to fit all KLT/Euro containers 600 x 400 mm and offer a high load capacity of up to 250 kg. As empties, they can be stacked to save space and stored in the smallest of spaces. Versions are available with and without side guides. All FATH castors for Dollies are equipped with high-quality wheels from the manufacturer Blickle Germany.

GUIDING RAIL FIFO (SET)

MODEL	Aluminum, anodized
DESCRIPTION	For guiding floor dollys on one side in FIFO stations, with a wheel width of up to 40 mm with 2 slots at the top, bottom and sides; to extend two guiding rails, connect them face to face with connecting strip in the slots; sign posts can be mounted in the slot from above
MATERIAL	Aluminum
SURFACE	Anodized
PACK QUANTITY	1 set (= 4 pieces)
TIP	For cut: To order, please replace "xxxx" in the part number by the required length in mm, e.g. "0350" for 350 mm or "2000" for 2000 mm Compatible connecting strip see 096060S20 Compatible for infeed cap for guiding rail FIFO (set) see 02082CCS01 Compatible monorail angle connector for post see 093WS30145S01 Compatible mounting set for posts support struts see 93WS30145S02 Compatible cover profiles see 092080

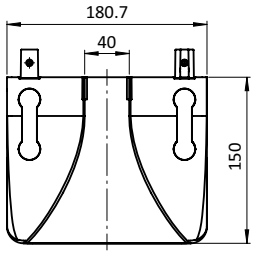
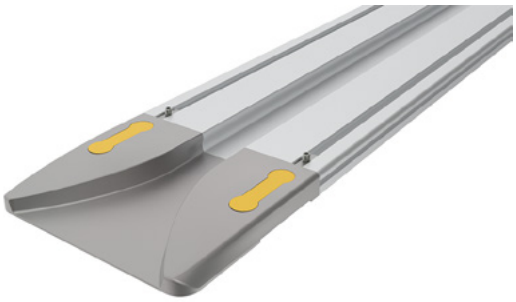
INFEED CAP FOR GUIDING RAIL FIFO (SET)

MODEL	Aluminum die-cast
DESCRIPTION	For easier loading and unloading of a FIFO stations with floor dollys; Robust design, mounting directly in the slot of guiding rails FIFO with enclosed hexagon socket set screws Yellow screw cover with signal effect to indicate the infeed position for the wheels of floor dollys
MATERIAL	Infeed caps: Aluminum die-cast Screw covers: Plastic PC Hexagon socket set screws: Steel
SURFACE	Infeed caps: Alu color powder coated Hexagon socket set screws: Zinc plated
COLOR	Screw Covers: Yellow ≈ RAL 1003
FASTENING	From the front, using M6 countersunk screws
PACK QUANTITY	1 set
SET	8 infeed caps 16 screw covers 16 hexagon socket set screws ISO 4027 - M6 x 8
TIP	Compatible Guiding Rails FIFO see 02082P.1200 Compatible Connecting Element for Guiding Rail FIFO see 02082D Compatible Fastening Set see 02082FS Compatible Screw Cover Infeed Cap for Guiding Rail FIFO as spare part see 02082S.15





Weight [g]	Part #

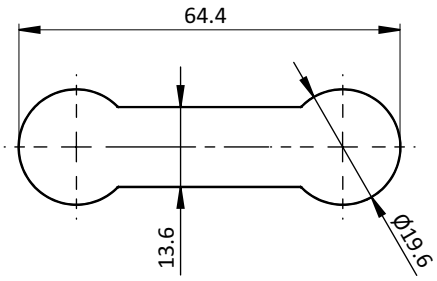
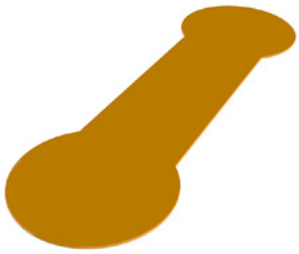
SCREW COVER INFEED CAP FOR GUIDING RAIL FIFO

MODEL	Self-adhesive
DESCRIPTION	To cover the screw holes of infeed caps for guiding rail FIFO; Yellow screw cover with signal effect to indicate the infeed position for the wheels of floor dollys; Included in the infeed cap set, here separately available as replacement
MATERIAL	Plastic PC
COLOR	Yellow ≈ RAL 1003
FASTENING	Self-adhesive surface on the backside
PACK QUANTITY	20 pieces





Weight [g]	Part #
7.5	02082S.15

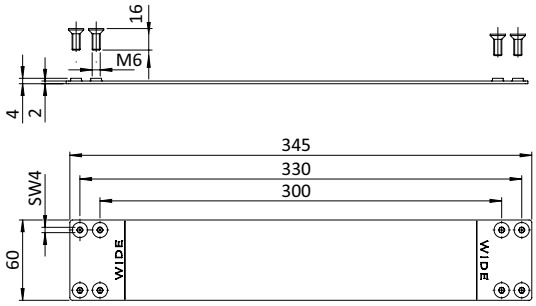
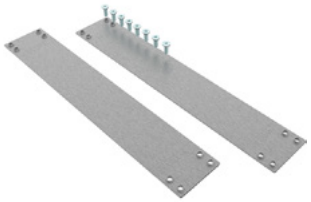
CONNECTING ELEMENT FOR GUIDING RAIL FIFO (SET)

MODEL	Stainless steel
DESCRIPTION	For parallel connection of two guiding rails FIFO, as spacer for aligning the track; To be screwed on infeed caps with enclosed screws
MATERIAL	Stainless steel
SURFACE	Plain
PACK QUANTITY	1 set
SET	2 connecting elements 8 screws DIN 7991 (ISO 10642) - M6 x 16
TIP	Compatible Guiding Rail FIFO see 02082P.1200 Compatible Infeed Cap for Guiding Rail FIFO (set) see 02082CCS01





Weight [g]	Part #
692.2	02082D

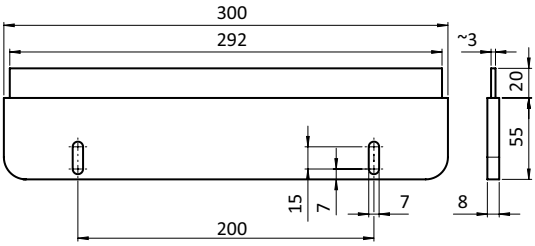
BRUSH BRAKE FOR GUIDING RAIL FIFO

MODEL	Aluminum, slot 8
DESCRIPTION	For braking and stopping dollies in guiding rails; Variable fixable via slot of the guide rail FIFO
MATERIAL	Body : Aluminum Bristles: Plastics PA
SURFACE	Body : Anodized
COLOR	Bristles: Black
DIMENSIONS	Total Length: 300 mm Length of the Bristles: 20 mm
PACK QUANTITY	1 piece
TIP	Compatible Guiding Rail FIFO see 02082P.1200



Weight [g]	Part #
149.38	02082BB

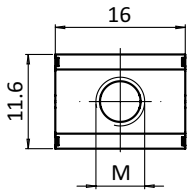
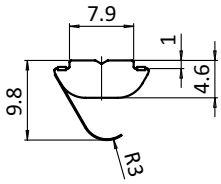
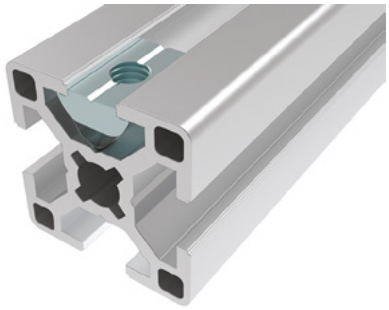
ROLL-IN T-SLOT NUT 11.6 X 4.6 MM WITH SPRING LEAF

MODEL	Slot 8, self-aligning with spring leaf, steel / stainless steel
DESCRIPTION	Self-aligning roll-in T-slot nut with spring leaf, ESD electrostatical discharging
MATERIAL	Steel Stainless Steel SS304 / SS303
SURFACE	Zinc plated / plain
PACK QUANTITY	100 pieces
SPECIALS	Different lengths with multiple threads in different sizes available on request







Material	Size	Profile	Weight [g]	Part #
Steel	M4	B	4.8	**096314F**
Steel	M5	B	4.7	**096315F**
Steel	M6	B	4.4	**096316F**

FLOWSORT® DIVERTERS

Intralogistics reinvented – modular, simple, scalable

As a leading intralogistics automation provider, Flowsort offers innovative solutions tailored to optimize efficiency and streamline operations across various industries. The Flowsort product portfolio consists of standardized sorting and transfer modules. All Flowsort sorting modules harmonize with all other intralogistics systems and technologies. They are easy to install, both in terms of hardware as well as for the software connection.

FLEXIBLE & SYSTEM-INDEPENDENT

HIGHLIGHTS

- Sorting performance: 2,500 – 8,000 products per hour
- Plug & Play: easy integration in conveyor systems saves planning and installation time
- Modular: innovative standard modules for maximum flexibility
- Scalable: sorting systems can be easily expanded at any time
- Gentle transport: Redirection of products in „Flow“ - no abrupt braking or excessive mechanical force

The conceptual design ensures a high degree of scalability and offers a completely new level of flexibility: sorting performance and layout can be adjusted to meet current requirements at any time. Even retrofitting existing intralogistics systems can be easily implemented with Flowsort. And all this comes in a fresh and modern design! The „Flow“ ensures that the sorted material is diverted particularly gently, without abrupt braking or mechanical force. This makes Flowsort sorting systems suitable even for fragile goods.

The energy consumption of the modules is very low due to the operation with 24 V motors. This enables energy savings and benefits the environment. Designed and manufactured in the EU, Flowsort sorting modules are very robust and ensure reliable operation of the automatic sorting system.

THE SOLUTION TO CURRENT INTRALOGISTICS CHALLENGES

In the distribution sector, smaller decentralized distribution centers are increasingly needed to ensure fast deliveries in conurbations. New automation technologies are needed to meet this challenge. Flowsort sorting modules are straightforward, flexible, quick to install, system independent and highly scalable. This makes the Flowsort modules perfect for streamlining intralogistics processes and setting up smaller distribution centers.

HIGH SPEED DIVERTER ECOFLOW

SLD = Single Line Diverter
DLD = Double Line Diverter

The Flowsort sorting modules are high-speed sorters that can be incorporated into any conveyor system. We use a modular system that you can configure according to your needs. For example, when you need a 3-row system, you connect an SLD (1-row) and a DLD (2-row) together - all plug & play.

ZZ= "ZigZag" Diverter

The ZZ-Diverter is a high-speed sorter in which the deflection discs are arranged in a zigzag line. This design allows the sorting of small packages with a size of at least 80x80mm.

SPEEDFLOW COMPACT

Introducing our smallest, lightest, yet fastest solution, the SpeedFlow Compact, available as SLD and DLD.

The reduced height of only 227 mm allows micro fulfilment centres to have more layers above each other. With an astonishing speed of 2m/s, we can achieve up to 8,000 products per hour throuput. The outstanding performance and slim design enables reliable and cost-effective sorting, even with limited space.

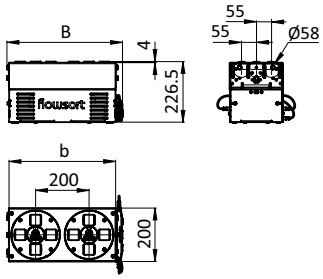
SPEED FLOW COMPACT SINGLE LINE DIVERTER SLD

DESCRIPTION	For automated sorting of objects with a minimum size of 150 x 150 mm (e.g boxes, containers, cartons, envelopes, etc.) Easy and fast integration in all common conveyor systems More compact design thanks to reduced module height Sorts at high speed in flow without abrupt movements, thus making it suitable also for sensitive goods Maximum layout flexibility due to stepless outfeed angles - 90° to +90° Plug & Play integration into all common PLC systems Retrofitting and scaling possible at any time Maximum sorting capacity: 6000 pieces / hour, depending on size of transported goods
MATERIAL	Rollers: Plastic TPU ≈ 70 Shore Case: Steel
SURFACE	Case: Laquered
COLOR	Rollers: Blue Case: Black
MAX. MASS CONVEYED GOOD (KG)	35 kg
CONTROL	1 control card per row: Standard I/O via M8 connector Supported protocols: Profinet, Ethernet I/P, Modbus/TCP or EtherCAT
OPERATING VOLTAGE / FREQUENCY	24 V DC
SPEED	Rotating speed: 180°/ 0.35 s Max. conveying speed: 2.0 m/s
PACK QUANTITY	1 piece
TIP	All widths between 400 - 1100 mm available



Version	B [mm]	b [mm]	Weight [kg]	Part #
2 sorter discs	430	400	198.0	SLD400-C
3 sorter discs	630	600	267.0	SLD600-C
4 sorter discs	830	800	333.0	SLD800-C
5 sorter discs	1030	1000	399.0	SLD1000-C

NEW

X-FLOW 90

X-Flow 90 is an innovative solution for effortless product transfer at +-90° degrees. The robust design ensures durability and stability. The belts are made of a special, high-grip composite material and are guided internally, which prevents them from jumping off the rollers. Benefit from the flexibility of leading edge orientation and the easy installation with custom flanges.

Features:

- Up to 50 kg lift capacity
- Can handle packages as small as 150 x 150 mm
- Innovative belt technology with internally guided high-grip belts
- Usable with any conveyor systems (even exisiting ones) based on customized flanges
- Easy installation with ready-to-use function blocks for all common PLC system

FLOWSORT ROLLERS

Upgrade your conveyor systems with ease! Our range of conveyor rollers are designed to meet the diverse demands of modern material handling systems. We are ready to tackle any challenge with a wide range of solutions. Durable, efficient, and highly customizable, our rollers ensure smooth and reliable performance for your operations.

Features:

- Low noise, high-speed
- Smooth operation
- Easy application
- Available in various sizes, diameters and materials

GRAVITY ROLLERS

O-BELT GROOVED

POLY-V ROLLERS

FLOWGUIDE

With FLOWGUIDE you can design your individual lateral guidance for efficient material logistics – optimally perfectly matched to your transported goods and the course of the roller conveyor.
