INDUSTRIAL HARDWARE

PRODUCT OVERVIEW

INDUSTRIAL HARDWARE

Our team spirit is "How can we help" and our motivation is to deliver solutions to gain our customers market advantages.

At FATH Inc., the North American subsidiary of FATH based in Orlando, Florida, we exemplify a customer-centric approach in delivering industrial hardware solutions. With over 30 years of expertise, we offer a comprehensive portfolio of more than 16,000 products, including over 7,000 unique items available for immediate shipment. Our products, ranging from locks, handles, hinges, and gaskets to advanced TAN*lock* modular access control systems, are designed to enhance productivity and flexibility in industrial workflows. By leveraging our international purchasing and production network, we ensure a balance of price, quality, and innovation tailored to the specific needs of our customers, fostering seamless integration into diverse OEM applications.

Our customer-oriented philosophy is deeply embedded in our operations, prioritizing trust, respect, and long-term partnerships. Established in 2003, our Orlando-based subsidiary operates a 43,000-square-foot distribution center and a fully staffed R&D department to deliver customized solutions, such as components for aluminum extrusion and intralogistics systems, that drive market advantages for our clients. Our "How can we help" ethos ensures that customer service permeates every department, from product conception through to delivery logistics. Additionally, our focus on social sustainability, including support for local communities and environmentally responsible practices, strengthens our reputation as a partner dedicated to enhancing customer experience while contributing positively to the broader ecosystem.

And this is what we mean by ENRICH YOUR WORKING LIFE.

"Where others see obstacles, we find quick and simple solutions for our customers."

Armin Fink

FATH CUSTOM COMPONENTS

Have it done.

New, rapidly developing markets require short response times to gain a clear competitive advantage. We are at your side as a partner with the entire expertise of our FATH Ecosystem and start finding solutions right away.

Pragmatic, fast, and with proof of concept.

As a driver of innovation, we combine our concentrated power of expertise, extensive experience, and even more developer mindset for you. We support you in implementing your innovation quickly and holistically.

INNOVATION

Development expertise and prototyping

Solution finding, 3D printing, pre-series testing, and series production all from a single source

FLEXIBILITY

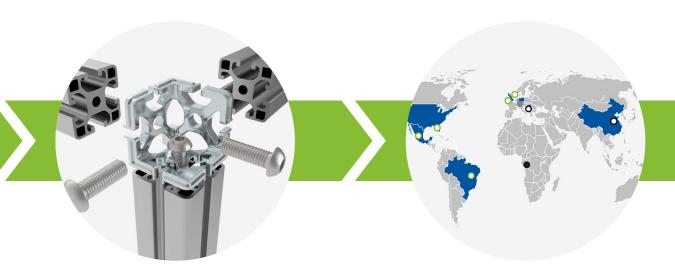

Outstanding technical expertise

Comprehensive range of machinery with global infrastructure

-14 DAYS

Roll up those sleeves and get it going:

- Understand requirements
- Develop solutions
- Produce samples
- Feedback
- Quotation
- Series production

35 YEARS OF EXPERIENCE

Global market leader in components for aluminum profile systems

We supply all common profile systems, deliver to system houses, and connect the various ecosystems.

RELIABLE SUPPLY

Global supply chain and fully integrated manufacturing

High availability, fast delivery, resilient supply chains, and large volumes

SUCCESS STORY 1: GRAVITY LOCK

1 CHALLENGE:

In some regions, bears rummaging through garbage cans is a widespread problem. This is increasingly affecting the safety of both humans and animals.

2 SOLUTION:

The specially designed lock system for waste bins cannot be opened by bears thanks to its mechanical locking mechanism, but automatically opens for garbage trucks and haulers, when the waste bin is emptied upside down.

3 RESULTS:

The widespread introduction of bear-proof waste bin locks has significantly reduced the conflict and thus also the risk—for both humans and animals.

4 ADVANTAGES FOR THE CUSTOMER:

- Reduction of conflict situations and protection against damage
- Increased safety in bear areas
- Efficient waste management

SUCCESS STORY 2: ERGOSAFE

ERGOSAFE: Redefining Enclosure Security

The telecom industry has long battled theft, with copper wires and batteries often targeted in smash and grab attacks. One of our customers brought this challenge to us, and after months of design and testing, the ERGOSAFE was born. It is a revolutionary swing handle that sets a new standard for enclosure protection.

Unlike anything else on the market, the ER-GOSAFE features outside the sealed area compression, offering unmatched security while maintaining quick installation and user-friendly operation. Its advanced padlock mechanism ensures that even if tampered with, the enclosure stays closed and can only be reopened with proper tools. This saves both time and costly repairs.

Today, ERGOSAFE is trusted across the United States in critical infrastructure applications, including telecom sites, energy facilities, and land-based equipment enclosures. It is another example of how FATH delivers real-world solutions to real-world challenges.

TANlock

Physical access control is vital for datacenter security, safeguarding data from unauthorized access, sabotage, and environmental threats like fire or dust. Sensors mitigate environmental risks, but insider threats or intruders demand robust access management. Datacenters use layered security (cameras, badge readers, guards), yet server cabinets remain vulnerable to unauthorized employee access, risking data theft or manipulation. dvanced access control with real-time monitoring ensures GDPR compliance and data protection.

TANlock 3, the modular electromechanical locking system, secures server racks with interchangeable authentication modules (PIN, RFID, fingerprint, hand vein) supporting two-factor authentication. It integrates with LDAP, MS ActiveDirectory, Syslog, SNMP, and APIs for real-time access monitoring and logging, ensuring GDPR compliance. With IP65 protection against dust and water. TANlock 3 suits indoor and outdoor racks, preventing unauthorized access and reducing risks of sabotage or breaches. offering a scalable, future-proof security solution.
